Matter description

Western Abalone was founded in 1982 by a group of pioneering families on the west coast of South Australia. The company's members dive and hand harvest abalone from the reefs that dot South Australia's remote western coastline.

Cooperative in ethos, the company operates a state-of-the-art plant dedicated solely to processing abalone for its members and other suppliers. Western Abalone processes predominantly for Asian export markets, supplying premium export grade IQF (individually quick-frozen), canned, pouch and live products.

Registered with and approved by the Australian Quarantine Inspection Service, Western Abalone have maintained an A-grade rating based on HACCP requirements.

Piper Alderman have advised Western Abalone over many years on a range of corporate and commercial matters, including intellectual property protection for the company's premium brand, "Golden Line" and corporate and governance advice.

What our client said

Kane Williams, General Manager, said:

"Piper Alderman have always provided accurate and timely advice on many facets of our business whenever it has been requested"
